Brian Bonilla

Student at CSUN, Senior year

Computer Science Senior at California State University, Northridge. Always ready to learn new skills.

Projects Worked On

Backend Developer for an App

trAln

Dec 2025-May2026

In this project, I am in charge of creating our live feed camera that tracks a persons movement using tools like Android Studio, Kotlin, and mediapipe. It highlights a persons body and displays a thirty tree landmark skeleton to show the users movement.

Frontend Developer for an E-Commerce Website

In this project, I was in a team of two helping create out front end of our E-Commerce website that was aimed to sell apparel. I was in charge of creating the main page using tools like scene builder and JavaFx.
